Our Story

SuperForm will always be family focused, as it was from the beginning.

Our father and uncle, two journeymen carpenters that swung the hammer for a living, recognized an opportunity: ICF was better than traditional wood frame construction in that it was rot proof, disaster resilient, sound dampening, energy efficient, and fire resistant. ICF was the way of the future.

In 1998, they made their dream a reality and SuperForm was born. The values our family instilled in the business still carry us today. Our thick red ties, corner tie, and the overall strength of our block set SuperForm apart for all building projects, whether for commercial, residential, agricultural, or industrial.

SuperForm products are designed to withstand everything North America's varied landscape and unique climate have to offer.

SuperForm builds stand tall, no matter what nature has in store.

SuperForm ICF

Secure, resilient, cost-effective, easy to use and environmentally sustainable.

SuperForm has a wide variety of block configurations and products to meet any of your building requirements: residential, commercial, agricultural or industrial.

Build with confidence, build with SuperForm ICF

- 6 construction steps built into 1 easy process.
- Strongest block available.
- The thickest embedded flange, making our tie the highest strength option.
- Two tight interlocking knobs every 1" provide unparalleled strength.
- Easy to install, reducing construction time, tools, and waste.
- Up to 60% energy saving compared to traditional construction.
- Supports all custom designs and the application of any exterior finish.
- Environmentally sustainable.
- Protects against extreme weather events, fire, and natural disasters.

A better way to build the future.

Discover the advantages of **THE BLOCK WITH RED TIES.**

AVAILABLE CONFIGURATIONS:

Straight (4", 6", 8" Core), 90 Degree (4", 6", 8" Core), 45 Degree (6", 8" Core),
Brick Ledge (6", 8" Core), Top Block (6", 8" Core), T Block (6", 8" Core),
Height Adjuster (not shown)

**2 Tight Interlocking
Knobs Every 1" Provide
Unparalleled Strength**

12" Panels

Accurate Rebar Slots

Flow Through Design

**Strong Corner
Tie with
Abundant
Fastening Area**

**6" Tie
Spacing**

**Thick + Wide
Tie Design
for Secure
Fastening**

**2.5" EPS
Foam Panels**

Super**Form** Insulation

Born from innovation — driven by technology. SuperForm insulation is an easy to install solution for any application.

A high-grade expanded polystyrene (EPS) rigid foam insulation, providing a dependable insulation product that can be used for almost every type of building application. Its stable R-value and compressive strength provide an inexpensive, energy-efficient insulation solution, available in a wide range of thicknesses.

EPS+ is manufactured from expanded polystyrene resin using a pentane blowing agent. This process does not use the hydrofluorocarbons (HFCs) typically used to produce XPS. The result is a closed, air-filled cell structure that does not contain HFCs and has a very low impact on the environment.

APPLICATIONS:

Wall, Ceiling, Perimeter, Below Grade,
Floor Insulation, Roofing, Floatation Blocks

A premium Neopor® graphite polystyrene (GPS) rigid foam insulation. MAX+ features all of the performance attributes of EPS+, complimented by the added benefits of its unique graphite cell structure. SuperForm MAX+ delivers one of the most efficient, cost effective, and sustainable insulation products available.

SuperForm MAX+ uses high-purity, graphite particles to create a reflective cell structure. This distinct cell structure reflects radiant heat as it travels through the insulation. As a result, MAX+ provides maximum energy efficiency, stability and durability, and moisture management.

APPLICATIONS:

Wall, Ceiling, Perimeter, Below Grade, Floor Insulation, Structural Insulated Panels (SIP), Precast Floor & Wall Panels

Build with SuperForm

Save construction time, tools, and limit waste with
the strongest block on the market.

Easy installation saves time and resources

SuperForm ICF works with all major materials and is designed for easy installs and pours. The result is a strong foundation with more time to put into other areas of your project.

Superior products in both quality and cost

With SuperForm you get high quality products that ensure your build stands the test of time, without the high cost.

Designed by builders, for builders.

SuperForm products are designed by experienced builders who understand the needs of builders, because we've been there. Our products are easy to install and handle, strong, cost effective, and incorporate 6 construction steps in 1, reducing the need for resources and tools. You'll save time, money, and energy, and your build will be better for it.

Live in SuperForm

A quiet, private space of your own.

Build a quiet home where you can gain a moment of privacy or turn the volume up without disturbing others.

A foundation that won't let you down.

Protect your family from the long-term structural effects of wood rot, or unforeseen events like foundation cracking leading to basement flooding. SuperForm ICF protects far beyond the capability of wood forms. Simply put, ICF forms keep you, your family, and your investment secure.

Stay comfortable and worry less about energy bills.

SuperForm ICFs keep your home warmer in the winter and cooler in the summer, ensuring you stay comfortable year-round while keeping energy bills lower than similar builds using traditional wood construction.

Building with the SuperForm system

ICF, Sheet Foam, and carefully chosen accessories work together to provide the strongest, most complete and builder-friendly system on the market.

With our proven quality, cost and time savings, and quick and easy installation, our red ties aren't the only thing that makes our product stand out.
