Shipping Products from your facility to your customer

Here are several options to get product from your facility to your customers.

ICF & Insulation

Flat deck with side racks

Side racks holds the full stack in place and prevents the strap from damaging the product.

Flat deck with edge protectors

Edge protectors protects the edges on the product from damage. Protectors need to be a L shape or screwed to the product to eliminate movement during travel.

Covered trailer

The covered trailer protects the product from wind and eliminates the need to strap it down
